LEE YONG LE

Full-Stack Developer

https://github.com/yongleee | +6018-407 4282 | Bukit Jalil, Kuala Lumpur

SUMMARY

Full-Stack Developer with hands-on experience building and maintaining full-stack applications. Proficient in front-end technologies including React and Next.js with Typescript, with strong back-end development skills in Express.js and Laravel. Experienced with SQL databases such as PostgreSQL, MySQL, and MSSQL. Passionate about continuous learning and staying current with emerging technologies. Eager to contribute to an innovative team where I can apply my skills and grow as a developer.

WORK EXPERIENCE

Full-Stack Developer **GlobeOSS | 2023 October- Present**

- Built and maintained full-stack web dashboards with dynamic charts, tables, and responsive layouts using React TypeScript, Next.js, Express.js, and Laravel, managing frontend state with Zustand, Redux, and Context API.
- Translated Figma designs into polished, responsive UIs using TailwindCSS, ShadCN, Bootstrap, and Material UI.
- Designed RESTful Laravel APIs for Excel upload/download pipelines with chunk-based processing, validation, deduplication, and bulk ingestion for large government datasets.
- Built asynchronous Laravel queue jobs with Redis and retry logic to offload time-sensitive operations, improving reliability and request throughput.
- Containerised applications with Docker, deployed behind Nginx with Supervisor-managed queue workers, and delivered production images via Azure Container Registry.
- Managed CI/CD pipelines on GitLab and Azure Pipelines with multi-stage dev-to-production deployments, secure env injection, and image tagging.
- Built a custom Keycloak SPI plugin integrating Microsoft Entra ID federated SSO, audit logging, and custom authentication extensions.
- Implemented RBAC by syncing Azure AD token claims into application permissions via Spatie Laravel Permission, enabling automated role assignment.
- Mentored interns and junior developers through code reviews, environment setup, and task delegation via GitLab issues.

Software Engineer Intern **GlobeOSS | 2023 June - 2023 October**

- Built a web application with interactive maps using React and OpenLayers to visualize real-time location data.
- Used Redux to manage user interactions like filtering and updating map views smoothly.
- Connected the app to a geospatial database (PostgreSQL with GeoServer) for fast and accurate data access.
- Created backend services in Express.js to fetch and deliver map data based on user input.

EDUCATION

Bachelor of Civil Engineering **February 2017 - October 2021**
Monash University

The Hacker Collective/Sigma School **January 2022 - October 2022**
Full-Stack Development Course

KEY SKILLS

Frontend
- React and Next.js TypeScript
- TailwindCSS, Shadcn, Material UI, and Bootstrap

Backend
- Laravel PHP
- Node.js with Express.js

Database
- PostgreSQL
- MySQL
- MSSQL

Other Tools and Languages
- Java (Keycloak SPI)
- Docker
- Git
